PRODUCT CATEGORY GUIDE & ETR™ BRUSH APPLICATIONS

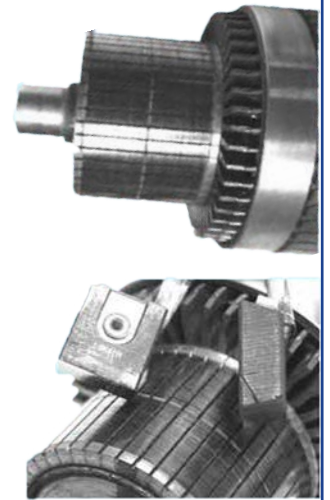

WITHOUT ETR™

Example of armature as removed from unit with 898.0 hours of service. After 3 brush changes, the commutator measured .047" wear.

WITH ETR™

Example of armature as removed from unit with over 1,000 hours of uninterrupted service. The commutator measured .003" wear.

SEEING IS BELIEVING

Maximize your return on investment with NAASCO's ETR™ technology. By eliminating the need for untimely brush changes, our ETR™ improvements increase starter generator reliability, reduce armature commutator wear and extend armature life.

Robinson R66 Starter Generator

YOU NOW HAVE OPTIONS!

SKURKA PN: 160SG143Q-2
ROLLS-RYCE PN: R30000412

**YOU NO LONGER HAVE TO
 RELY ON THE OEM!**

BETTER FOR YOUR BOTTOM LINE

Take advantage of NAASCO's 35 years of starter generator manufacturing and overhaul experience. From the team that brought the industry the patented ETR-25™ "Mercury Mod™" upgrade for helicopters and fixed wing starter generators, we now offer a comprehensive solution for the Skurka 160SG-Series starter generator fitted to your Robinson R66 turbine helicopter.

PROVEN RELIABILITY

Since 1984, NAASCO has continued to provide money-saving repair and overhaul solutions for obsolete, troublesome, or otherwise costly aircraft components. Our production, engineering, and quality control leadership team brings a combined electrical, mechanical, and avionics experience of over 250 years. Be rest assured that you will receive the finest quality overhauls in the industry.

WORRY-FREE SERVICE

We guarantee our friendly staff will treat you with respect; and, any and all questions or concerns will be answered in a timely manner.

- Our team lives and breathes aviation and takes their jobs very personally. You can be assured that we will deliver a first in services product and customer service experience.
- High quality components with full warranty/trace
- Unparalleled production management
- Dual release FAA/EASA 8130 tag issued on all units

FAST TURNTIMES

NAASCO provides a two-week turnaround time. For clients that need faster service, an express routine overhaul (2-3-day turn) is available for a modest adder. In AOG situations, next day service will be provided.
