

# Advanced Mercury Mod™ Upgrades for Cessna Caravan Aircraft

Form #45

Enhanced Cooling for  
Greater reliability

200SGL119Q  
200SGL119Q-2  
200SGL153Q

## NAASCO's ETR™ brushes

Brushes removed from customer unit. At 1,532 hours TSO, wear lines indicate more than 50% brush life remaining.

## Caravan Operators:

NAASCO's exclusive Mercury Mod™ overhaul process is the "Best Value" for your Cessna Caravan!

### • Enhanced cooling

A modified anti drive-end endbell along with other internal elements provide enhanced cooling for greater reliability.

### • Predictable Performance

Our advanced Mercury Mod™ eliminates the need for untimely brush changes. Your maintenance and labor costs are substantially reduced.

### • Commitment to Excellence

We strive to maintain the highest levels of quality and dependability to give our customers the competitive edge.
