### Lowest Operational Costs!

#### BETTER FOR YOUR BOTTOMLINE

Take advantage of NAASCO's 35 years of starter generator manufacturing and overhaul experience. From the team that brought the industry the patented ETR-25™ "Mercury Mod™" upgrade for helicopters and fixed wing starter generators, we offer a comprehensive solution for the Skurka, Safran, and Thales starter generators fitted to your Airbus Helicopter AS350-Series helicopter.

#### PROVEN RELIABILITY

Since 1984, NAASCO has continued to provide money-saving repair and overhaul solutions for obsolete, troublesome, or otherwise costly aircraft components. Our production, engineering, and quality control leadership team brings a combined electrical, mechanical, and avionics experience of over 250 years. Be rest assured that you will receive the finest quality overhauls in the industry.

#### WORRY-FREE SERVICE

We guarantee our friendly staff will treat you with respect and all questions or concerns will be answered in a timely manner.

- Our team lives and breathes aviation and takes their jobs very personally. You can be assured that we will deliver a first in services product and customer service experience.
- High quality components with full warranty/trace
- Unparalleled production management
- Dual release FAA/EASA 8130 tag issued on all units

#### FAST TURNTIMES

NAASCO provides a two-week turnaround time. For clients that need faster service, an express routine overhaul (2-3-day turn) is available for a modest adder. In AOG situations, next day service will be provided.
